## Reason for Procedure

Kirkwood encourages full-time employees to serve as KCELT instructors. This procedure explains the employment of full-time employees in a secondary faculty capacity and the impact on payroll.

## The Procedure

Full-time employees are encouraged to work as KCELT faculty for Kirkwood in the following circumstances:

- **Teaching assignment as part of current duties.** The Administration, at its discretion, may require an employee to perform a teaching assignment as part of his/her regular job duties. In these cases, the employee will receive no extra compensation as such time is considered part of the current duties of the employee. If the employee would like to add a teaching assignment to his/her regular job duties, the employee must obtain approval from his/her supervisor prior to accepting such an assignment.
- **Teaching assignment not part of current duties but during regularly scheduled work hours.** If the teaching assignment is not required by the Administration and the teaching assignment occurs during the regularly scheduled work day, as determined by the Administration, Kirkwood will:
  - Require the employee to make up hours worked and obtain approval from his/her immediate supervisor of a written schedule to make up such hours;
  - Compensate the employee for faculty/instructor hours at the appropriate rate for the assignment;
  - Limit, in general, the employee to a maximum of 4 hours per week of faculty/instructor hours because the assignment may interfere with the full-time duties of the employee;

- Require the employee to utilize vacation time for all hours over 4 during regularly scheduled work hours under the rare circumstance that more than 4 hours of faculty/instructor time is approved in writing by his/her immediate supervisor; and
- Require the employee to obtain written approval from his/her immediate supervisor prior to accepting the teaching assignment.

**Teaching assignment not part of current duties and outside regularly scheduled work hours.** If the teaching assignment is completed outside of the regularly scheduled workday, as determined by the Administration, and the teaching assignment is not required by the Administration, Kirkwood will:

- Compensate the employee for faculty/instructor hours at the appropriate rate;
- Require that the teaching assignment not interfere with the full-time duties of the employee; and
- Require the employee to obtain written approval from his/her immediate supervisor prior to accepting the teaching assignment.

**KCELT Compensation:**

- **Exempt/Non-Faculty Employee Compensation.** Current Exempt/Non-Faculty Employees pay will be 150% of his/her hourly equivalent pay rate for the agreed upon teaching and prep hours.
- **Faculty Compensation.** Current faculty are encouraged to teach KCELT professional development sessions in addition to their normal course load. Faculty will receive the adjunct pay rate for KCELT teaching. KCELT will not be calculated as part of the faculty member's credit workload, be used as part of the load, or overload.
- **Non-exempt Employee Compensation.** For any non-exempt employee serving as a KCELT instructor, Kirkwood will compensate that individual in the form of a stipend of 150% of his/her hourly equivalent pay rate for the agreed upon teaching and prep hours.

**Overtime.** All overtime compensation will be determined and, if applicable, calculated using the following provisions:

- **Faculty/Exempt Employees.** Faculty/Exempt employees accepting teaching assignments will not be paid any overtime for his/her assignment.
- **Non-exempt Employees.** When a non-exempt full-time employee works over 40 hours in a single workweek due to a combination of hours from the teaching assignment and his/her regular duties, Kirkwood will utilize a weighted average calculation to obtain the overtime pay. That is, his/her total earnings are computed to include his/her compensation during the workweek from all hours (teaching or regular), and are then divided by the total number of hours worked at all jobs. The new rate will be multiplied by one half, and then, multiplied by the hours over 40.

For example, if non-exempt employee Smith works 38 hours at his/her regular job paying \$10 per hour (for a total of \$380) and 5 hours of teaching paying \$15 per hour (for a total of \$75), the weighted average would equal \$10.58 per hour (or \$455 ÷ 43 hours). His/her overtime pay would equal one-half of \$10.58 times five hours (or ½ x Overtime Rate x Hours over 40), which would equal \$26.45. (**Note:** the employee already received the straight time pay for 43 hours and thus only gets the extra ½ time of overtime pay.)
