

4.0 EXPOSURE DETERMINATION

Exposure determinations are based on an employee's reasonable potential for occupational exposure to blood or OPIM. The following exposure determination and task assessments shall be made without regard to the use of personal protective equipment.

Category I: Tasks that involve direct contact with blood, body fluids, or tissues. All procedures, or other job-related tasks that involve an inherent potential for percutaneous, mucous membrane, or skin contact with blood or OPIM, are Category I tasks. The use of appropriate protective measures will be required for every employee engaged in Category I tasks.

Category II: Tasks that involve no exposure to blood or OPIM, but may require performing unplanned Category I tasks. The normal work routine involves no contact with blood or OPIM, but contact may be required as a condition of employment. Appropriate protective measures shall be readily available for every employee engaged in Category II tasks.

Department	Job Classification	Cat I	Cat II	Tasks
Athletics/Recreation Center	Coach/Athletic Trainer		X	First Aid
Campus Health	Campus Health Director/Registered Nurse	X		Direct patient care, cleaning of exam room surfaces
CTRC	EMT's	X		Direct patient care
