Logical expressions & selection structures

Logical program flow

- Sequential
- Sequential with method calls
- Control structures:
  - selection
  - looping

Boolean data type

Relational expressions (primitive data types)

- ==
- !
- >
- <
- >=
- <=

Boolean methods (object data types)

- equals
- compareTo

Logical expressions

- &&
- ||
- !

Short-circuit evaluation

Logical equivalence

Selection structures

- if
- if/else
- nested if/else
- switch/case
