

Assignment

While we will not produce a budget for your business, you will need to figure out how much money you'll need to start the business.

This means you'll need to figure out

- What equipment & furniture
- What retail inventory
- What operating supplies

You'll need.

For this assignment, you should create a spreadsheet that lists all the things you need to buy to start the business... including your estimate of their cost! (You should total these – that's the reason for the spreadsheet).

Use the internet, catalogs, and any other resource you can find (pet supply stores? Office supply stores?) to figure out those dollar amounts.

Due Monday, November 9.

Example

(hint – don't use these numbers!)
