Project Title: Automated calling system
Sponsor or Approver: Peg Julius

Project Description and Scope: We would like to implement an automated system to make phone calls to various student populations. We have routine calls that could be handled well and quickly using this type of system.

Most Important Requirements: Large capacity to reach many people with in a variety of ways: phone calls, emails, text messages.

Project Type: software
Places Impacted: all student services departments.
People Impacted: All students and staff reached using this method.
