Project Title: Campus LMS Study Group
Sponsor or Approver: Todd Prusha
Project Description and Scope: Kirkwood is currently in year two of a three license agreement with CE6 (WebCT/Blackboard). An evaluation of the current online course management system (CE6) and study and exploration of possible alternative course management systems is needed. This is a large commitment financially for the college. Additionally, the college's LMS directly impacts over half of the credit students enrolled in the college. The current LMS (CE6) is used by full online, courses, hybrid courses and web enhanced face-to-face courses.
What is the Current Process? I am not familiar with how the current system was chosen. For a new process I suggest a study group be formed to research, evaluate and test various LMS products. Participation on this need will be needed from faculty, administration, technical staff, professional staff and students.
Project Type: Places Impacted: All classroom environments; face-to-face, Hybrid (F2F/online) and online.

This is a software evaluation but it may also involve purchasing new hardware
People Impacted: Faculty, Staff, Students, Administrators Budget Code:
