Extract Process for SQL Data Stores

End Users input data into Colleague and request data from web site

Orchestrator Processing

Extract Process for Data Store extracts data from Colleague and sends to SQL server

odsware SQL Server

Web server (odsware.kirkwood.edu/Reports)

www.kirkwood.edu

Application info from registrations sent to DB on SQL Server

Students apply to KCC via web

Web Server stores reports that are created in Visual Studio using tables from Data Stores. Users can access reports assigned to their security group in SQL. Windows security is used to verify users.

Off Campus access via IE from the KCC Portal.

End Users requesting reports.
