R18 Meeting 1-11-2007

Attendance:
Darren Zabloudil
Jon Neff
Ken Collier
Kris Tharp

Review the submitted documentation.

1. Quote and drawing are at too high level lacking detail.
   a. Is this a generic handout?
   b. Need more details
2. We need help with the implementation.
   a. Design without implementation is useless to us (physical part)
3. Definition of Support and Implementation.
4. What guarantees do they have for future assurances re we afforded with this
   a. Do want to turn around in 2 years and have to buy more hardware
5. Question about space on the SAN per the drawing
   a. Currently 18 * 9 = 150 GB combined
   b. Future 300 GB distributed
   c. Drawing spec list 6 TB
   d. Can you furnish us with a reference/contact of a school similar to our size?
   e. Site survey and visit an existing Sysix Customer
   f. Where is their closest customer that is similar to KCC?

Side notes:

1. We would not need Switches
2. We would not need Tape Lib
3. We would not need Rack
4. Maybe move Traffic Management to later
   a. Exactly what is the value of this piece (need to understand this better)
5.
